Healius announces 3-year partnership with Children’s Cancer Institute.

Healius is delighted to announce that it has come onboard as a major corporate partner of Children’s Cancer Institute - the only independent medical research institute in Australia wholly dedicated to curing childhood cancer and finding safer treatments.

Over the next three years, Healius will support Children’s Cancer Institute in their quest to find a cure for childhood cancer through a number of fundraising initiatives.

Healius CEO, Dr Malcolm Parmenter, an ambassador for Children’s Cancer Institute CEO Dare to Cure, said:

“Each day, our people across Healius provide specialty diagnostic services and medical care to cancer patients. We are delighted to be able to extend this care further into the community, through our partnership with Children’s Cancer Institute.

“The life-saving research of Children’s Cancer Institute is making a real difference to children who have received a devastating cancer diagnosis and we are proud to help support their journey to cure childhood cancer.”

Healius is one of Australia’s leading healthcare companies providing high quality, accessible and cost-efficient healthcare services through our Pathology, Imaging and Day Hospital businesses.
